DETAILED ACTION

Oath/Declaration

1. There is no Oath/Declaration present in the instant application. The applicant must submit a statement as to why the Declaration was not present or proof that one was submitted and/or lost by the Office.

Specification

2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.
3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "**means**" and "**said,**" should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

4. Claims 1-2 and 21-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. The following claims lack proper antecedent basis:

i. The preambles of the dependent claims recite “A” instead of --The-- which would provide proper antecedent basis.

b. The following phrases are vague, indefinite, and/or awkwardly and confusingly worded:

i. “a leverage portion” in claim 1, line 3 and claim 2, line 3. Which leverage portion is this referring to the leverage portion on the first and/or second jaw.

ii. “or” in claim 1, line 9 and claim 2, line 9. Limitations cannot be claimed in the alternative.

iii. “nut and bolt assembly is pivotally connected to the first jaw member and the second jaw member” in claim 27, lines 1&2. The jaw is pivotable with respect to nut and bolt. The applicant is suggesting that nut and bolt pivot when in fact is only first jaw that pivots.

Claim Rejections - 35 USC § 102

Art Unit: 3723

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Logan (2537838).

Logan discloses a wrench having a first (15) and second jaw (10) members, a handle (22) with an engagement means (21&25), and a connecting means (20)

Allowable Subject Matter

7. Claims 21-32 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ellison, Steinke, Hsu, Stanton, and Evarts disclose a device.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lee Wilson whose telephone number is (703) 305-4094.
